AgriBridge: Government Scheme Agent

Hey AgriBridge! I've just uploaded my Aadhaar. Can you look at my address on the card and tell me if I qualify for any State irrigation subsidies? I'm currently farming about 1.5 hectares of paddy near Surat. Also, check if there are any specific benefits for Small Farmers like me in the 2026 budget.

Based on the information from your Aadhaar card, your address is 119, Jay Shivam Society-2, Singanpore Cozway Road, Surat City, Surat, Gujarat - 395004. You are farming approximately 1.5 hectares of paddy.

Regarding State irrigation subsidies in Gujarat for 2026, the **Micro Irrigation Scheme** is a key program. Under this scheme, a uniform subsidy of 50% of the Micro Irrigation System (MIS) cost or Rs 60,000 per hectare (whichever is less) is provided. There are additional benefits for Tribal (ST) and Schedule Caste (SC) farmers (an extra 25% subsidy or Rs. 90,000 per hectare, whichever is less) and for farmers in "Dark Zone" areas (an additional 10% subsidy).

For the most accurate and up-to-date information on specific eligibility criteria, including the definition of a "Small Farmer" for these schemes and whether your area in Surat falls under a "Dark Zone," you should visit the **Gujarat Ikhedut portal** or contact your local agriculture office.

In addition to irrigation support, the 2026 budget includes other general subsidies that may benefit farmers, such as:

- Fertiliser subsidies
- Seed subsidies
- Electricity support
- PM-KISAN direct income support
- PMFBY crop insurance premium subsidy
- Kisan Credit Card (KCC) for low-interest loans
- Soil Health Card for better nutrient planning

Please check the Ikhedut portal for detailed scheme lists and application procedures relevant to your specific situation as a small farmer in Gujarat.

can you explain more about PMFBY crop insurance premium subsidy ?

The Pradhan Mantri Fasal Bima Yojana (PMFBY) is a crop insurance scheme launched in 2016 to safeguard farmers against crop loss due to unforeseen events and stabilize their income.

Here's how the premium subsidy works:

- **Nominal Farmer Contribution:** Farmers pay a small, nominal share of the actuarial premium.
  - For **Kharif food and oilseed crops**, the maximum premium payable by the farmer is 2% of the Sum Insured or the actuarial rate, whichever is less.
  - For **Rabi food and oilseed crops**, it's 1.5% of the Sum Insured or the actuarial rate, whichever is less.
  - For **Annual Commercial/Horticultural crops**, it's 5% of the Sum Insured or the actuarial rate, whichever is less.
- **Government Subsidy:** The significant portion of the actuarial premium (95-98.5%) is subsidized by the central and state governments, typically shared on a 1:1 ratio. The difference between the actuarial premium rate and the farmer's payable insurance charges is treated as the normal premium subsidy, which is shared equally by the Centre and State.
- **Special Provisions:** In some regions, such as Himachal Pradesh, other North-Eastern states, and Jammu & Kashmir, farmers receive a 100% premium subsidy from the government for all notified crops.
- **Implementation:** The scheme is administered by the Department of Agriculture, Cooperation and Farmers' Welfare under the Ministry of Agriculture, in collaboration with empanelled general insurance companies.
- **Enrollment:** It is mandatory for loanee farmers (those who have taken institutional loans) and voluntary for non-loanee farmers.
